

New Slide 2012

As part of the continuing renovation plan for the Lehi Outdoor Swimming Pool, Lehi City has contracted with AquaBlue and CEM to build two new water slides to replace the old slide that was taken down last summer. These slides along with the two Aquaclimb walls installed last season are part of a several year renovation project to make the outdoor pool a family fun place. Future projects include a complete renovation of the bath house to include new lockers, carpet, flooring and a re-design of the lobby area. Other projects include an additional pool or splash pad, more parking and more access to the lawn area around the pool and more pool toys.

Target Opening
End of June
